RECEIVED

AMENDMENT

In response to the action mailed September 16, 2002 ("Office Action"), please amend the application as follows:

In the claims:

Please amend claims 1, 11, 14, 19 and 20 as follows:

Sub B1  
a1  
-- 1. (Amended) A light source for examination of a substance which emits light at a wavelength greater than a wavelength of light emitted from the light source when the substance is excited by the wavelength of light emitted from the light source, the light source comprising:  
a housing having a light outlet; and  
a low-voltage lamp positioned in the housing and oriented to emit light through the light outlet,  
wherein the low-voltage lamp emits light of a wavelength within a predetermined range effective to enhance the detection of emission of light from a substance when the substance is excited by the wavelength of light emitted from the lamp.--

Q2  
8.  
-- 11. (Amended) The light source of claim 1, wherein the lamp is connected to a source of electrical power and the source of electrical power is a battery.--

93  
Sub B2  
-- 14. (Amended) A light source for examination of a substance which emits light at a wavelength greater than a wavelength of light emitted from the light source when the substance is excited by the wavelength of light emitted from the light source, the light source comprising:  
a housing having a light outlet; and
